ESTOS ECSTA 3.0, e.g. for Siemens Hipath 3000 V8.

Special Upgrade Discount!

valid until
31.03.2010

With the brandnew **ESTOS ECSTA 3.0 product family** ESTOS launches the next generation of protocol converting middleware. The version 3.0 stands for compatibility with the latest generation of Microsoft operating systems, Microsoft Windows Server 2008 (R2) and Windows 7, as it supports latest CSTA standards and features, in particular CSTA III. Completely new and redesigned configuration masks improve the usability of the software and make it easier to handle for administrators.

The third ESTOS ECSTA generation supports the latest versions of PBXs:

The ESTOS ECSTA for Siemens Hipath 3000 (also V8!), the ESTOS ECSTA for Siemens Hipath 4000 via CAP and the ESTOS ECSTA for Alcatel Lucent OXO and OXE and the ESTOS ECSTA for OpenScape Voice, the ESTOS ECSTA for NORTEL via SIP, the ESTOS ECSTA for Aastra 5000 and the ESTOS ECSTA for Aastra OpenCom X mark as major milestones the ECSTA series' roadmap.

Following the slogan "future integrated", ESTOS is the only vendor that offers a broad and scalable portfolio of professional middleware and drivers for the conversion of PBX specific protocols into the MS Windows world in 32- and 64-bit and for Windows Server 2008 (R2) and Windows 7.

There is special promotional offer for existing customers now!

The highlights of the ESTOS ECSTA 3.0 series:

- Professional 3rd-party TAPI Service Provider (TSP) functionality
- Transparent conversion of the ECMA CSTA protocols (I/II/III) to MS TAPI (2.1/2.2/3.0)
- Compatibility with Microsoft Windows 7 and Windows Server 2008 R2
- Simple initial installation and maintenance

Other features of ESTOS ECSTA 3.0:

- Free 45-days trial software without registration available for download
- Upgrade path from „older“ ESTOS ECSTA license to the new version 3.0
- Available as 32- and 64-bit Microsoft Windows operating systems compliant version
- MultiSite and MultiVendor support

Free 45-days evaluation version available at:
