# ixi-UMS 7 Enterprise

Unified messaging software

# ixi-UMS 7 Enterprise

ixi-UMS is a unified messaging software which allows the management of fax, voice and SMS services under one interface. All message types are available to the user at the PC workstation, both voice and with the familiar e-mail interface.

## NEW:

- New design for the administration interface (MMC)
- ixi-UMS portal server, i.e. the users' websites have been combined
- Extensions for ixi-UMS voice mailbox
- New features in the ixi-UMS client tools

# ixi-UMS Enterprise: What is new?

- New design for the administration interface (MMC)
- ixi-UMS portal server, i.e. the users' websites have been combined
  - New ixi-UMS portal server with new web interface for the user – the ixi-UMS user portal
  - For the ProCall Client there is now only one WebTab (previously two) for accessing the new ixi-UMS user portal
- Extensions for ixi-UMS voice mailbox
  - Recording announcements via headset on the PC: "It is now also possible to record the announcement text directly via the headset"
  - Create announcements via TTS "The announcement text can be entered and then created as a recording via Text to Speech"
  - Profile for internal callers "An announcement can be stored that is played back for calls from internal subscribers"
- New features in the ixi-UMS client tools
  - TLS support for the SMTP client (TLS= Transport Layer Security)  
TLS is a protocol for the encryption of data transmissions on the internet
  - The ixi-UMS SMTP client now has a simple address book. The address book can be opened in the ixi-UMS SMTP client.

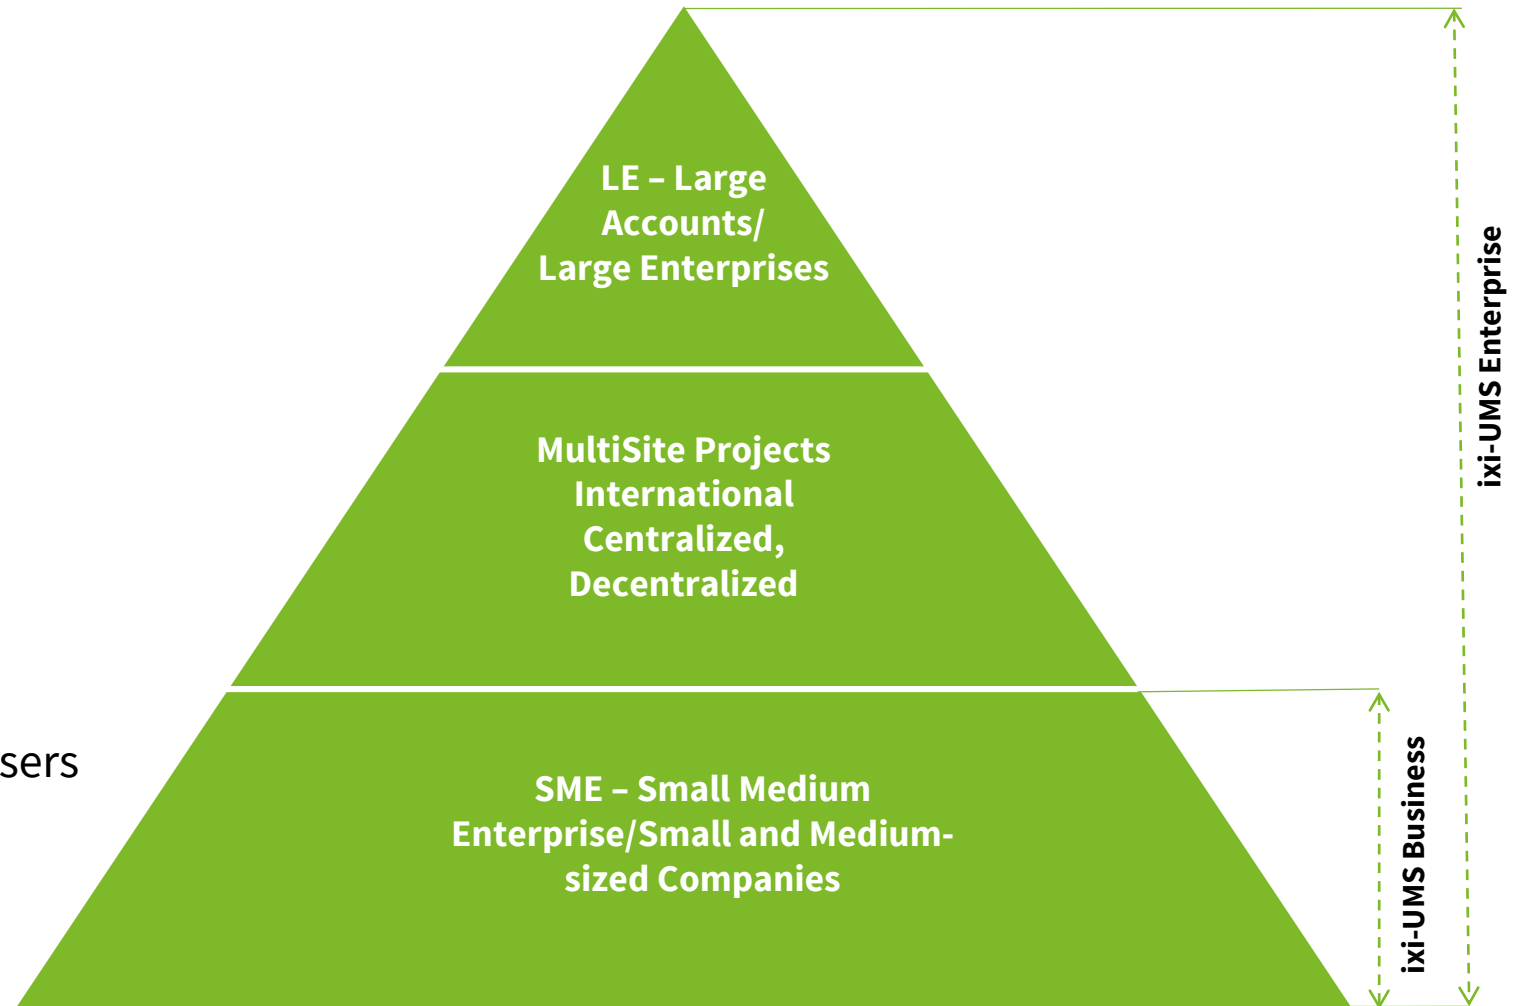

# ixi-UMS

- ixi-UMS Enterprise

- Modular
- Focus LE
- Highly scalable
- Reliable
- Highly available
- MultiServer operation
- MultiSite and multiVendor
- Diverse security concepts

- ixi-UMS Business

- Complete package up to 100 users
- Focus SME
